

WILL COUNTY MUNICIPAL AGGREGATION AGREEMENT:  
CARBON-FREE, FIXED-PRICE ELECTRICITY FOR OUR COMMUNITIES

Over the last seven years, the successful Will County electrical aggregation program has saved residents nearly \$30 million - or more than \$350 per household.

Last summer, after a competitive bidding process, fifteen Will County communities came together to continue that success by selecting Constellation, a longtime competitive energy supplier in the state, to provide sustainable, 100 percent carbon-free electricity through a three-year, fixed-price supply agreement.

Here's what you need to know about the agreement:

- The rate negotiated with Constellation is \$0.07517/kWh through October 2021
- One hundred percent of our communities' energy is carbon-free, meaning Constellation matches all of your energy usage with emission-free energy certificates from a generating source that does not directly produce greenhouse gas emissions.
- The fixed-rate contract provides price certainty for the entirety of the term.
- Beginning in June 2019 the utility's price-to-compare is expected to be lower than the price offered through community aggregation.
- The utility's price to compare fluctuates seasonally and will be reset to an unknown rate in January 2020.
- The negotiated agreement includes the ability to switch suppliers or return to the utility at any time without incurring a termination fee. Other suppliers may charge a penalty. For more information residents should use Constellation's 24-hour customer service number 1-844-252-4216 or online at [www.constellation.com/il-willcounty](http://www.constellation.com/il-willcounty).
