

Village Green – Final Construction Phase – Post Bid

March 2020

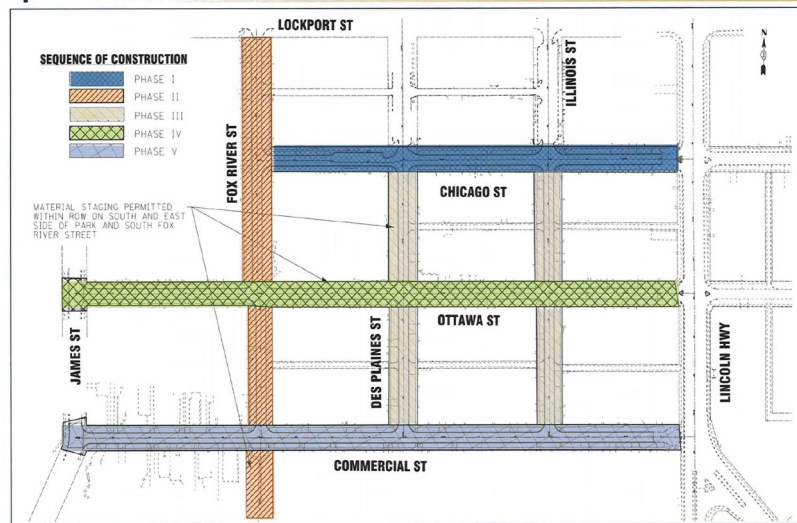

Dear Residents and Business Owners,

The Village of Plainfield received (5) five bids for the last phase of the Village Green Roadway project. The low, qualified bidder was Gallagher Asphalt Company and the contract was awarded on March 2, 2020. This is the final year of a three-year project with over \$8,000,000.00 invested in the Village Green area over that period.

The project is scheduled to begin construction in mid-April. The exhibit shown below, is the staging for the (5) sections planned for the work. The first one being on Chicago Street from Fox River to Route 59 and so on. The completion date is planned for October 23, 2020.

This project involves the complete reconstruction of the roads, concrete curbs, sidewalks, utility adjustments, decorative street lighting and parkway restoration. For those residents with plantings in the public right-of-way area, it is strongly suggested to relocate them as soon as possible as they will be removed as part of the project. Also, any irrigation lines in ROW/Public space, will need to be located before construction starts. Every effort will be made to provide for emergency services, mail, etc.... but please be aware that road closures will occur from time to time and parking on adjacent streets is encouraged. The Village appreciates your cooperation and understanding as we complete this final phase of the Village Green reconstruction project.

Sequence of Construction
